

Keynote at All-IUFRO Conference

Our Future Forests – Global Challenges and Local Opportunities

by

Dr. Florian Kraxner

International Institute for Applied Systems Analysis (IIASA)

🕒 22 September 2022, 09:30 – 10:45 CEST

📍 Vienna, Hybrid Event

Florian Kraxner is a principal research scholar at the International Institute for Applied Systems Analysis (IIASA), where he heads the research on Agriculture, Forestry, and Ecosystem Services. With his team, he puts emphasis on integrated global landscape modeling complemented with renewable energy systems optimization and impact assessment of climate change with a particular interest in natural disturbances. His research portfolio includes forest and landscape restoration, nature-based and climate solutions, and land-based negative emission technologies. Biodiversity, sustainability, and a strong link into societal topics are cross-cutting themes throughout his work. Since 2018, he is the president of the International Boreal Forest Research Association (IBFRA).
