

## THE ONLINE INFORMATION BULLETIN OF THE GLOBAL FOREST SCIENCE NETWORK

### IUFRO at the Global Landscapes Forum

On 16 and 17 November 2013, the first Global Landscapes Forum (GLF) was organized at the University of Warsaw, Poland, on the sidelines of the 19th Conference of the Parties (COP19) to the UN Framework Convention on Climate Change (UNFCCC).

In previous years there had been two separate events, the Forest Day and the Agriculture, Landscapes and Livelihoods Day. The combination of the two events aimed to establish a joint global platform to raise awareness on the importance of sustainable landscapes. The Global Landscapes Forum drew more than 1200 participants including policy makers, scientists, climate negotiators, civil society, media, etc.

Discussions focused on four major themes: investing in sustainable landscapes in forests and on farms; landscape policy and governance for forestry, agriculture and other land uses; synergies between adapting to and mitigating climate change in forest and agricultural landscapes; and landscapes for food security and nutrition.

#### Executive Summary

**Key messages and recommendations from the Global Landscapes Forum for UNFCCC negotiations and Sustainable Development Goals**

<http://www.landscapes.org/executive-summary-key-messages-global-landscapes-forum/#.UqGRXqBhJgA>

#### Global Landscapes Forum Outcome Statement

<http://www.landscapes.org/global-landscapes-forum-outcome-statement/#.UqGQyqBhJgA>

#### Summary Statements from Sessions at the Global Landscapes Forum

<http://www.landscapes.org/summary-statements-sessions-global-landscapes-forum/#.UqGSS6BhJgA>

For further details, please visit the GLF website at:

<http://www.landscapes.org/>

or the IISD coverage of the event at:

<http://www.landscapes.org/iisd-global-landscapes-forum-report/#.UpSTPKBhJgA>

For a summary of the Warsaw Climate Change Conference (<http://www.cop19.gov.pl/home>) that took place from 11-23 November 2013 in Poland and gathered over 8,300 participants, please see the IISD report at: <http://www.iisd.ca/climate/cop19/enb/>

*Participants of the GLF Discussion Forum on Governance and Legal Frameworks for Sustainable Landscapes (by Hugo Pierre, IFSA/IUFRO)*

#### IUFRO contributed actively to the Global Landscapes Forum in its capacity as a member of the Collaborative Partnership on Forests by:

- Co-organizing two highly successful discussion forums as part of the formal program
- Advertising IUFRO and especially the IUFRO 2014 World Congress in the GLF exhibition area;
- Participating in the joint social media communication activities.

#### Discussion Forum

#### Governance and legal frameworks for sustainable landscapes

IUFRO, IDLO, CIFOR

There has been a global consensus since the Brundtland Report that environmental, social and economic challenges must be addressed equally to achieve sustainable development. We also have consensus that any policy response to sustainable development challenges must incorporate multi-level governance and cross-sectoral approaches. Despite this consensus and despite the many efforts to achieve sustainable development, there is ongoing frustration about the slow progress.

This slow progress is therefore not due to a lack of attention to goals and problems, but is instead owing to a lack of learning around policy instruments. We suggest that learning, which integrates knowledge about how policy pathways have succeeded – or failed

- to solve problems is a missing step: this is referred to as a policy learning architecture.

Learn more and continue to read the forum summary report at the IUFRO blog: <http://theiufroblog.wordpress.com/2013/12/05/governance-and-legal-frameworks-for-sustainable-landscapes-glf-discussion-forum-17th-november/>

**Speakers:**

*Benjamin Cashore*

Professor, Environmental Governance & Political Science; Director of the Governance, Environment, and Markets Initiative at Yale (GEM) and Director, Program on Forest Policy and Governance

*Robert Kibugi*

Lecturer on Environmental Law, University of Nairobi

*Daniela Kleinschmit*

Professor, Swedish University of Agricultural Sciences, Dept of Forest Products, Head of Forest Policy Unit

Moderator: *Niels Elers Koch, IUFRO President, University of Copenhagen*

Also read: "Scientists urge tact in crafting forest governance systems" by Thomas Hubert, CIFOR <http://www.trust.org/item/20131129051257-eudl1>

**Discussion Forum**

**Linking gendered knowledge with gender-responsive action in the landscape: What works? WFO, FANRPAN, IUFRO, CIFOR**

In a discussion forum on linking gendered knowledge with gender-responsive action in the landscape, it became clear that making the case for the potential of a landscapes approach to build climate change resilience depends in large part on showing the resilience of the women who are part of those landscapes. (...)

*Seema Arora-Jonsson from the IUFRO Working Party on Gender Research in Forestry* began the session by examining truisms concerning women and climate change. The most striking of these truisms are that women are the poorest of the poor and are more prone than men to die in natural disasters. However, data about local socio-economic contexts is often lacking, and there is no conclusive evidence to support these truisms. Still, this begs the question: Are these inaccurate claims being used to portray women as helpless victims? Why is it necessary to cast them in this light at all?

Continue to read this blog post by Charles Plummer (*Gender in Agriculture Partnership (GAP)*) at: <http://www.gender-gap.net/content/resilient-women-resilient-planet>

**Speakers**

*Seema Arora-Jonsson*

IUFRO, Swedish University of Agricultural Sciences

*Sue Carlson*

Women's Committee, World Farmers Organization

*Nathalie Eddy*

Coordinator, Global Gender and Climate Alliance

*Belynda Petrie*

CEO, OneWorld Sustainable Investments

Moderators: *Antonia Andugar, Copa-Cogeca*

*Esther Mwangi, CIFOR*

**Forests and Food Security  
New Global Forest Expert Panel  
Approved by CPF**

In the framework of its Global Forest Expert Panels (GFEP) initiative, the Collaborative Partnership on Forests (CPF) unanimously approved the establishment of a new IUFRO-led GFEP on Forests and Food Security at its meeting in Warsaw, Poland, on 18 November 2013.

Photo by IUFRO

The goal of the Expert Panel is to provide a comprehensive assessment of scientific knowledge about the role of forests and trees for food security and nutrition. The Panel will develop a report aiming to provide policy makers, investors and donors with a stronger scientific basis for their decisions, policies and projects related to forests, trees, food security and nutrition.

For background information and updates please visit: <http://www.iufro.org/science/gfep/>

**Santa Claus Has Accepted the Role of European Forest Week Ambassador**

Watch this video: <http://www.fao.org/news/audio-video/detail-video/en/?uid=10241>

**Metsä2013**, the joint session of the UNECE Committee on Forests and the Forest Industry and the FAO European Forestry Commission is taking place from 9-13 December 2013 in Rovaniemi, Finland. During Metsä2013, the **Second European Forest Week** is being organized.

Visit: <http://www.fao.org/forestry/efw2013/en/>

Find the IISD event summary at:

<http://www.iisd.ca/forestry/metsa/2013/>

Also follow EFW on Twitter: #EFW2013

In the course of the week, the *International Forest Students' Association (IFSA)*, together with IUFRO organized a side-event on Forestry Education entitled "**Future of Education - Future of the Sector? - Current issues in Forestry Education**", with a focus on forestry education at an academic level in the ECE region. A full report of the meeting will be published in the January issue of IUFRO News. At the EFW2013, *IUFRO's Task Force on Forests and Human Health* was also involved in a side event entitled: "**Forest biomasses as a source of novel bioactive compounds**".

## IUFRO 2014 World Congress Registration Is Open!

Come to the 24<sup>th</sup> IUFRO World Congress in Salt Lake City, 5-11 October 2014, to share knowledge and meet colleagues from around the world!

### Early-bird registration rates through April 2014:

<http://iufro2014.com/registration/>

### Find latest Congress updates at:

<http://iufro2014.com/news/>

## 2014 IUFRO World Congress Host Country Scientific Achievement Award

### Call for Nominations due December 31, 2013

The Congress Host Scientific Achievement Award honors a truly outstanding scientist from the host country (for 2014 IUFRO World Congress, the United States of America) who has elevated the profile of forest science and research accomplishments. For more details, visit: <http://iufro2014.com/wp-content/uploads/2013/09/CALL-FOR-NOMINATIONS-2014-IUFRO-Host-Country-Scientific-Achievement-Award.pdf>

## Scientist Assistance Program (SAP)

IUFRO and the World Congress Organizing Committee are proud to sponsor scientists from developing countries to attend the World Congress through the Scientist Assistance Program. The SAP will offer delegates the choice of taking full and/or partial support to attend the Congress. Learn more at: <http://iufro2014.com/registration/scientist-assistance-program/>

## Students at the IUFRO 2014 World Congress

The IUFRO World Congress and the Society of American Foresters (SAF) National Convention offer exciting opportunities for undergraduate, graduate, and Ph.D. level students. Consider joining an SAF student chapter or the International Forestry Students' Association (IFSA) before the event, if you're not currently a member! If your school does not have an IFSA or SAF student chapter, consider starting one! For details, visit: <http://iufro2014.com/registration/student-registration/>

## Exposition and Sponsorship Opportunities

The 2014 International Union of Forest Research Organizations World Congress combined with the Society of American Foresters' 94th Annual Convention and the Canadian Institute of Forestry's Annual Meeting will be one of the largest collection of leading forestland managers, scientists, and decision makers in one location. This unique opportunity will position your organization before a diverse domestic and global audience interested in many dimensions of managing natural resources, sustainability, and research. Find out more at: <http://iufro2014.com/trade-exhibition/>

## 2014 SAF/CIF Convention Call for Abstracts is Open!

In 2014, the Society of American Foresters (SAF, <http://www.safnet.org/>) will partner with the Canadian Institute of Forestry/Institut forestier du Canada (CIF/IFC, <http://cif-ifc.org/>), for a joint convention on 8-11 October 2014 in Salt Lake City, Utah, USA.

The convention *will be co-located with the IUFRO World Congress*. This exceptional convergence will bring several thousand forest scientists and managers from more than 100 countries together in Salt Lake City, Utah during the first full week in October. These co-located events will enhance knowledge exchange and networking among professionals who study and manage forest resources around the globe.

**Information about the convention**, including details about presenting papers or posters, as well as detailed track descriptions: <http://www.safconvention.org>

**Abstracts submission:** <http://www.xcdsystem.com/saf>

**Questions about the program** should be directed to Carol Redelsheimer at [redelsheimerc\(at\)safnet.org](mailto:redelsheimerc(at)safnet.org) or 301-897-8720 ext. 240.

*Please note that abstracts submitted to IUFRO which were not accepted for oral presentations are NOT being sent to the SAF Program Committee by the IUFRO Congress Scientific Committee. If an author wishes to have their paper that was not accepted by IUFRO considered by the SAF Program Committee, they must resubmit it through the SAF on-line web link.*

## The Economist's 2nd World Forests Summit Unlocking the True Potential of Forests

**How can forests be managed profitably and sustainably?** Forests cover 30% of the planet's total area and play a crucial role in the world's environment, health and economy – yet they are increasingly under threat. Forest and tree ownership is changing with private ownership on the rise. The *Economist Events' World Forests Summit* takes place on **20 March 2014** at the Grand Hôtel, **Stockholm, Sweden**. The event will encourage open and frank discussions with all stakeholders on the true economics and future of forests. *Speakers include* Janez Potocnik, Commissioner for the Environment, European Commission, Tony Simons, Director General, World Agroforestry Centre and, Mario Boccucci, Head of Secretariat, UN-Redd Programme.

*IUFRO has partnered with The Economist Events for the World Forests Summit. You can receive 20% discount on the standard registration when you quote IUFRO/DC at the checkout.*

For more details, please visit:

<http://www.economistinsights.com/sustainability-resources/event/world-forests-summit-2014...>

## The International Conference on Wood Adhesives 2013

Report by Chris Hunt, US Forest Service, Forest Products Laboratory  
<http://www.forestprod.org/woodadhesives/>

The International Conference on Wood Adhesives 2013 took place from 9-11 October 2013 in Toronto, Canada, and involved [IUFRO Division 5 Forest Products](#) and Research Group [5.04.00 Wood Processing](#).

From adhesive suppliers to users of the downstream product, from industry to academia, government, or NGO, this conference provided an opportunity to interact with leaders in the field from around the world and hear about the latest developments. It is held every 4 years, this time with 226 attendees from 28 countries, and was organized by the US Forest Service, Forest Products Laboratory, the Forest Products Society, and the University of Toronto.

To encourage industry participation, the Wood-Based Composites Center (WBC), a U.S. National Science Foundation Industry/University Cooperative Research Center, was invited to hold their semi-annual Industry Advisory Board Meeting in conjunction with the Conference. Forty WBC industry professionals and faculty and seven WBC graduate students participated in both meetings. The WBC is a multi-university research center focused on conducting member-requested fundamental research for the wood composites industry while training future professionals. This model worked well for both groups and will be repeated for future conferences.

### Key topics

Several talks discussed how the **adhesives cured on a sheet** to make an easy specimen for testing can, in some cases, have properties very different from the same adhesive cured between two pieces of wood. The difference is that wood absorbs certain low molecular weight components from the adhesive before cure is complete. Data was presented which suggested this absorption phenomenon influenced bond properties in such diverse areas as physical morphology, extent of cure, thermal-mechanical stability, bond strength, and formaldehyde emissions, among others.

**New analytical methods** continue to allow researchers to ask questions that previously could not be addressed. New applications in nanoindentation, x-ray tomography, x-ray fluorescence, and modeling, for instance, are making new experimental approaches possible.

Strong interest continues in developing **bio-based alternatives to conventional products**. Multiple talks were driven by a desire to replace fossil fuel based materials with bio-based materials.

Plenary session speakers discussed the **outlook for wood adhesive needs** and requirements (consumer and regulatory) in North America and Europe. The keynote emphasized the power of transformational thinking to create enormous value to a company and its customers.

Photo provided by Forest Products Society: Plenary session draws speakers and attendees from around the world to discuss the science and future of wood adhesives.

Winners of the Student Poster Competition included Jesse Paris, Oregon State University (first place), Matthew Schwarzkopf, Oregon State University (second place), and Ashley Hellenbrand, University of Maine (third place). All three students are supported by the Wood-Based Composites Center, WBC.

A peer reviewed conference proceedings will be electronically published in January by the Forest Products Society. Work has already begun in terms of choosing a venue for the next International Conference on Wood Adhesives in 2017, with Chris Hunt ([cghunt@fs.fed.us](mailto:cghunt@fs.fed.us)) as point of contact.

Oral and poster presentations are already available for viewing at [http://www.forestprod.org/attend\\_events/past\\_conferences/wood\\_adhesives\\_2013.php](http://www.forestprod.org/attend_events/past_conferences/wood_adhesives_2013.php) to conference attendees, and will be available to all FPS members 6 months after the conference.

### Forests for Prosperity - 25th Session of the Asia-Pacific Forestry Commission (APFC)

The conference took place on 5-8 November 2013 in Rotorua, New Zealand, and was well attended with about 150 participants.

IUFRO Board Member Eckehard Brockerhoff promoted IUFRO at the conference. He participated also in a satellite meeting of the "Asia-Pacific Forest Invasive Species Network" (<http://apfisn.net/>) which was well attended by forest health experts from the region. There he gave a presentation on ecological risk assessment, and highlighted some of the work that is being done in IUFRO.

<https://www.etches.com/ehome/apfc2013/138255/>

## 18th International Nondestructive Testing and Evaluation of Wood Symposium 2013

By Xiping Wang, USDA Forest Service Forest Products Laboratory, Coordinator of IUFRO Working Party 5.02.01 (<http://www.iufro.org/science/divisions/division-5/50000/50200/50201/>)

The 18th International Nondestructive Testing and Evaluation of Wood Symposium was held on September 24–27, 2013, in Madison, Wisconsin, USA (<http://www.forestprod.org/symposium2013/>). The event was hosted by the USDA Forest Service's Forest Products Laboratory (FPL) and co-sponsored by IUFRO 5.02.01 *Nondestructive Evaluation of Wood and Wood-Based Materials*.

This symposium was a forum for those involved in nondestructive testing and evaluation (NDT/NDE) of wood and brought together many NDT/NDE users, suppliers, international researchers, representatives from various government agencies, and other groups to share research results, products, and technology for evaluating a wide range of wood products, including standing trees, logs, lumber, and wood structures.

Networking among participants encouraged international collaborative efforts and fostered the implementation of NDT/NDE technologies around the world. 190 scientists from 21 countries attended this event. Over 150 technical presentations were

made in 12 technical sessions and one poster session. The technical content of the 18th Symposium has been captured in 800 pages of proceedings, which can be accessed from FPL's website: <http://www.fpl.fs.fed.us/>

The 18th Symposium was especially important because in addition to its strong technical content, it was a celebration of 50 years of this symposium series! The opening session, "From Strong Beginnings to an International Research Community," included keynote speakers from around the globe who presented the state-of-the-art in nondestructive testing and evaluation of wood.

A special publication, *Fifty Years of Nondestructive Testing and Evaluation of Wood Research - International Non-destructive Testing and Evaluation of Wood Symposium Series*, was produced by FPL (FPL General Technical Report 213) in commemoration of the 50<sup>th</sup> anniversary.

*Photo of participants by Steve Schmiedling*

## Positions, Fellowships

### Assistant Professor of Remote Sensing and Spatial Analysis

The School of Forest Resources and Environmental Science, Michigan Technological University, in Houghton, Michigan, USA, invites applications by 13 January 2014. <http://www.iufro.org/discover/noticeboard/#c14607>

### Open Positions at FPInnovations

Research Leader, Pulp Performance and Markets  
Chemical Engineer, Kraft Chemical Recovery  
Scientist/Engineer, Pulp Quality and Process Applications  
Research Leader, Market Pulp, Fibre Cost and Quality.  
All positions are based in Vancouver, BC, Canada. <http://www.iufro.org/discover/noticeboard/#c14607>

### Assistant Professor of Forest Products/Utilization and Wood Science

The School of Forestry at Northern Arizona University invites applications for the position of Assistant Professor of Forest Products/Utilization and Wood Science. <http://www.iufro.org/discover/noticeboard/#c14607>

### International Climate Protection Fellowships

for young climate experts from developing countries interested in conducting a project in Germany and developing long-term collaborations. Submit an application if you come from a non-European transition or developing country and are involved with issues relating to the scientific, engineering, legal, economic or social aspects of climate change. Deadline for application is 15 March 2014. The fellowship will begin on 1 March 2015.

<http://www.humboldt-foundation.de/web/icf.html>

### 3-year PhD Studentship

The James Hutton Institute and the University of Dundee, in the United Kingdom, bring your attention to a 3-year PhD studentship on *Realising land's potential through biomass production in Scotland? Prospects vs. challenges for ecosystem-based adaptation*.

This 'Competition Funded Project for European/UK Students' with the deadline of January 17, 2014, has now gone live on <http://www.findaphd.com/search/ProjectDetails.aspx?PJID=49141&LID=1374>.

For further information, please contact:

Maria Nijnik, maria.nijnik(at)hutton.ac.uk

## Publications

### Proceedings of Pine Wilt Disease Conference 2013

IUFRO 7.02.10 Conference, 15-18 October 2013, Braunschweig, Germany  
<http://www.iufro.org/publications/proceedings/proceedings-meetings-2013/#c20388>

### Entrepreneurship and Management in Forestry and Wood Processing – Principles of Business Economics and Management Processes

By Franz Schmithüsen, Bastian Kaiser, Albin Schmidhauser, Stephan Mellinghoff, Karoline Perchthaler and Alfred W. Kammerhofer

First published 2014 by Routledge, Taylor and Francis Group, London and New York  
 Routledge Explorations in Environmental Economics No 42; 496 pp. ISBN; 978-0-415-59101-0 (hbk); ISBN: 978-1-315-88459-2 (EBK)

This book applies the main concepts of modern managerial science to the world of forestry and renewable natural resources utilisation. It is the perfect book for students studying forestry, environment and wood processing, as well as entrepreneurs and managers within the wood-based sector. Topics are covered from an entrepreneurial perspective and include perspectives from accounting, finance, economics, supply chain management, marketing and strategy.

### IUFRO Spotlight on "Issues and Options Briefs"

The IUFRO Task Force on International Forest Governance has developed a learning architecture designed to translate insights from scholarly research into practical strategies for stakeholders championing sound forest management.

Together with the Governance, Environment and Market (GEM) initiative at Yale University, the Task Force has released a first set of "Issues and Options Briefs on Forest Policy" on November 16, at the Global Landscapes Forum in Warsaw.

Papers with titles such as 'Bridging Certification and Community Forestry through NTFPs: A Case Study from Nepal'; and 'Can Legality Verification Combat Illegal Logging in Brazil? Strategic Insights for Policy Makers and Advocates' were presented during the forum.

Read the full IUFRO Spotlight at: <http://www.iufro.org/media/iufro-spotlights/spotlight-16/>

Find the briefs at: <http://www.iufro.org/publications/series/occasional-papers/#c20966>

### Journal: Annals of Silvicultural Research (ASR)

ASR is the follow up and on-line version of the journal ANNALI, which had been published in hard-copy and under different names since 1932 by the current Forestry Research Centre of the Consiglio per la Ricerca e la Sperimentazione in Agricoltura (CRA-SEL) in Italy. ASR is a peer-reviewed journal featuring original scientific articles, reviews and notes on all aspects of silviculture  
<http://ojs-cra.cilea.it/index.php/asr/index>

## Awards

*IUFRO Working Party 2.08.07 Genetics and Silviculture of Acacia Announces Distinguished Contribution Award Basis for Selection of Awardees*

This award is to be presented to a senior scientist in recognition of their sustained and significant contribution to the development of acacia plantation forestry

*Timing:* One award may be made at each periodic Working Party 2.08.07 meeting providing that a worthy recipient can be identified

*Selection procedures:* Any WP 2.08.07 member may make a nomination for consideration and final decision by the Coordinators. Such nominations must be received in writing at least 3 months in advance of each meeting.

*Physical description:* A simple plaque with suitably worded inscription. Funding for this will be organized by the Working Party Coordinators.

## Congratulations

*ICIMOD Celebrates 30th Anniversary*

The International Centre for Integrated Mountain Development (ICIMOD), member of IUFRO, is an organization dedicated to working on issues relevant to the people and environment of the Hindu Kush Himalayan region. The Centre's 30th Anniversary was being observed throughout the year and culminated in a celebration on 5 December. <http://www.icimod.org>
