VOLUME 81 NUMBER 5 2008

Mini-Special Issue

Complex Stand Structures

Complex stand structures and associated dynamics: measurement indices and modelling approaches

P. Newton

573

Modelling the change in aspen species composition in boreal mixedwoods

S. X. Meng, S. Huang, V. J. Lieffers, and Y. Yang

575

Diversity indices based on angle count sampling and their interrelationships when used in forest inventories

H. Sterba

587

Percent stocking models for four major Alberta tree species

Y. Yang, S. Huang and W. R. (Dick) Dempster

599

Effect of stand structure on Stone pine (*Pinus pinea* L.) regeneration dynamics

I. Barbeito, M. Pardos, R. Calama and I. Cañellas

617

Early growth and form of common walnut (*Juglans regia* L.) in mixture with tree and shrub nurse species in southern England

J. R. Clark, G. E. Hemery and P. S. Savill

631

Estimation of forestry stand parameters using laser scanning data in temperate, structurally rich natural European beech (*Fagus sylvatica*) and Norway spruce (*Picea abies*) forests

M. Heurich and F. Thoma

645

A comparison of cultivation techniques for successful tree establishment on compacted soil

D. Sinnett, J. Poole and T. R. Hutchings

663
